## Education

**Can Tho University** 2018 - 2022
Major: Information Technology
Degree: Very good

## Technical Stacks

**Programming Languages**
Java, C, C++, Rust, Javascript

**Technologies**
SpringBoot, Hibernate, MariaDB, Linux, ShellScript, HTML, CSS

**Networking**
Common protocols: TCP/UDP, Socket programming, HTTP/HTTPS, SSH, FTP, SNMP

**Addition Skills**
OOP, Git, Design Database, Searching and Write document

**English**
Able to use English in conversation, good at reading and writing skills

## Work Experience

💼 **Project LotteCard at FPT Software (15 members)**
📅 07/2024- current(full-time)
**Main Responsibilities**
- Analyze customer requirements and develop new features
- Handle bug tickets to improve web/mobile application services
- Perform batch data processing for importing and exporting data
- Optimize database queries to enhance performance
- Review other team members' code to maintain quality and minimize bugs in production

💼 **Project AMS at TMA Solutions**
📅 07/2023- 7/2024(full-time)
**Main Responsibilities**
- Develop features base on the customer requirements.
- Fix the software's defects and enhance performance
- Collaborate with foreign team.
**Accumulate experience**
- Gained experience on web applications using Spring MVC and Hibernate
- Gained experience in working/communicate with foreign team.
- Gained knowledge about Linux Redhat Enterprise, ShellScript and system administration

- Gained knowledge about networking DDI(DHCP, DNS, IP Management)
- Gained experience working in Scrum development environment.

## 💼 Project VitalSuite at TMA Solutions
📅 05/2022- 07-2023(full-time)

**Main Responsibilities**
- Develop and fix the application's defect base on requirements.
- Nightly support customer when they have issues

**Accumulate experience**
- Gained valuable experience in designing and implementing complex web-based applications using Java and C++ technologies
- Gained knowledge about networking, operating system especially Linux, increasing project performance
- Gained knowledge about networking HTTP/HTTPS, SNMP, Socket
- Working with MariaDB database, increase query performance.
- Gained experience in working/communicate with America customers.
- Collaborate with team members.
- Gained experience working in Scrum development process.

## 💼 Project Patch Management Tool at TMA Solutions(Internal Tool)
📅 2/2023- 07-2023(part-time)

**Main Responsibilities**
- Develop API Gateway: Routing, Catching, Authentication and Authorization
- Develop a REST API Patch Service using Spring Boot, PostgresQL
- Develop a Logging feature
- Write Readme and User Guide document
- Review others team members's code

**Accumulate experience**
- Gained valuable knowledge about microservice and implementing to the project
- Gained knowledge about streaming data tool Apache Kafka, catching using Redis
- Gained knowledge about PostgresQL Database
